Lingual Retention Wire Set

Designed by Dr. Yoav mazor
 MY Smart Orthodontic Products ©

A highly advanced and unique retainer wire, ensuring the best retention at the end of the orthodontic treatment. Can be used for other cases which require a bonded retainer.

Description:

- Bio-compatible high grade Nickel Titanium alloy
- Only 017 mm thickness (0.07 inch) – the thinnest existing retainer wire in the market today
- Rectangular cross-cut to ensure better torque retention
- Pre-bended (vertical bend) to prevent wire activation
- Easy to adapt - “dead soft”
- High resistance to breakage
- Unique “clips” for wire stabilization on bonding

CAT. NO.: RTN.WIRE.KIT1

The kit contains:

Photo	Cat. No.	Application	QTY
	RTN.WIRE.UP1	Upper Lingual Retention Wire	5
	RTN.WIRE.LO1	Lower Lingual Retention Wire	5
